Office Action Summary

Art Unit: 1754

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 44 is rejected under 35 U.S.C. 102(b) as being anticipated by Benish et al. 'C2H2 and PAH as Soot Growth ...'.

The reference teaches forming pyrene. See pg. 2321.

Claim 44 is rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Howard et al. 5985232.

Howard teaches in columns 2 and 3 forming a combustion flame and collecting hydrocarbon condensibles from a liquid. Even though pyrene is not recited, it is deemed to be present to the extent that a material whose boiling point is 393C can be found in a liquid phase proximate to a flame. No differences are seen. Columns 7 and 8 describe recovery and purification.

Applicant's arguments filed 8/25/03 have been fully considered but they are not persuasive.

The product claimed has not been shown to be different. The process is allowed, in that it does not encompass fullerenes- only organic hydrocarbon compounds.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication should be directed to examiner Hendrickson at telephone number (703) 308-2539.
